Lies amongst the rolling coast range foothills where the vineyards sit at higher elevations, creating wines with intense flavor and structure.

MOMTAZI VINEYARD
- Acres: 250
- Exposure: East & South
- Clones: Pommard & Dijon
- Elevation: 450 to 700 ft.
- Soil: Nekia, Yamhill Series, Peavine and Jory

Known for coastal winds that provide cooler temperatures at night and keep acids firm during the ripening process.

SYMONETTE VINEYARD
- Acres: 16
- Exposure: South West
- Clones: Pommard, Wadenswil & Dijon
- Elevation: 320 to 380 ft.
- Soil: Willakenzie, Jory and Nekia

Oregon’s warmest and driest winegrowing region, making it suitable for both cool and warm-weather wines.

SUNDOWN VINEYARD
- Acres: 19
- Exposure: East
- Clones: Pinot Noir, Syrah, Viognier
- Elevation: 1600 ft.
- Soil: Bellpine, Rickreall, Suver

Home to the first grapes planted in the Willamette Valley and is known for its rich, red volcanic Jory soils.

MEYER VINEYARD
- Acres: 26
- Exposure: East & West
- Clones: Pommard, Wadenswil, Dijon
- Elevation: 550 to 800 ft.
- Soil: Jory, Nekia

Featuring three important hillside soil types such as basaltic, ocean sedimentary and loess while spanning 100 square miles to touch three different counties.

CHEALEM MOUNTAINS AVA
- Acres: 35
- Exposure: South & East
- Clones: Dijon 113, 777 & Pommard
- Elevation: 575 to 675 ft.
- Soil: Jory
